JLI Anti-Human Trafficking & Modern Slavery Hub

ENDING EXPLOITATION WITH EVIDENCE

WHAT IS THE JLI ANTI-HUMAN TRAFFICKING & MODERN SLAVERY HUB?

Bridging connection between local faith communities and global action for better engagement.

We are a horizontal evidence-based learning community that links academics, policy makers, and governments with local faith communities in order to combat human trafficking and modern slavery together.

WHY SHOULD I JOIN?

Building capacity of local faith communities through development and sharing of evidence-based processes and practices.

Connect with colleagues from around the world to leverage joint expertise, develop and engage in evidence-based practice, and work collaboratively.

HOW IS THIS NETWORK DIFFERENT?

Linking global actors and local faith communities for evidence-based research and more effective results.

Our distinction: We work with other networks globally to ensure our evidence-based practice research is shared widely.
